

a

b

inside each training block only

- 4-fold cross-fitting for the PLSR anchor residual
- cultivar-stratified validation for epoch and residual gate
- 3-fold inner CV for SVR C, gamma and epsilon

60/60 recorded production gates equal the internal gates

channels the execution design forbids

- ✗ test labels into any selection
- ✗ test fruit into auxiliary pretraining
- ✗ test fold into anchor cross-fitting
